

OUR SOLUTIONS

Smart Payment Processing Platform

The ORIO platform consists of seller tools, website payments, e-wallets, coin facilities, a marketplace and a mobile platform.

Multi Currency Wallet

ORIO recognizes the need for interoperability and thus introduces a wallet that will use inter-blockchain exchanges to transfer between multiple cryptoassets and cryptocurrencies.

ORIO Token Creation Event

The ORIO Token Creation Event will last for 14 days, starting 8:00am UCT on 27th of SEPTEMBER 2017. A fixed number will be created during the sale, and no more will be created thereafter.

ORIO Token

The power behind ORIO is the ORIO digital token. The ORIO token is an open source token conversion protocol based on smart contracts enabling a single party to convert any token to another without requiring a second party to exchange with. End-users can receive, hold, transfer, request, purchase and liquidate ERC20 tokens and other majors altcoins.

Debit Card

The ORIO Debit Card is usable at Visa® compatible payment terminals and ATMs around the world. ORIO card users load their cards with funds from other supported digital wallets.

ORIO as Coupon and Reward

ORIO will create a universal and decentralized coupon and reward platform for real cash value to be used by all businesses and consumers anywhere in the world.

Use of Funds

The proceeds from the funds will finance development, partnership programs, float (both fiat and token), operations, regulatory and most importantly, marketing and customer acquisition.
